

# AND 7530

High Yields, Broad Disease Protection

## AND 7530

- ➔ *Selected for increased persistence*
- ➔ *Dark-green color with medium-fine stems*
- ➔ *High resistance to all 5 major diseases*
- ➔ *Excellent Stem Nematode resistance*
- ➔ *Excellent winter survival*
- ➔ *Fall Dormancy rating: 3.0*
- ➔ *WSI = 2.4 (Winter Survival Index)*

### ***Adaptation***

Parent stock for AND 7530 was specially selected to meet the demands of alfalfa growers in the areas where a 3-fall dormancy is suitable. It was selected for yield and persistence and is especially well suited to areas where root diseases like Bacterial wilt, Fusarium wilt, and Phytophthora root rot threaten yield production and reduce stand life.

### ***Top Yield Performance***

AND 7530 has demonstrated excellent yield ability out yielding varieties like Magnum IV, GH 755, Rainer, DK 133, Pioneer 5454, Vernal, Wrangler, and Ladak 65.

### ***Quality***

AND 7530 produces dark green foliage that makes it ideal for hay. Its persistence is excellent under both normal and aggressive harvest schedules. Because AND 7530 offers producers broad-spectrum pest resistance and excellent persistence, this high yielding variety will keep producing quality hay for many years.

### ***Broad Spectrum Pest Resistance***

AND 7530 resists Phytophthora and Verticillium wilt. These two diseases can significantly reduce production and stand life. In addition, AND 7530 has excellent resistance to Bacterial wilt, Fusarium wilt, Anthracnose, Pea Aphid, and Stem Nematode.
