

## BERRIES AND MORE

### STRAWBERRIES

Cultivar	Season	Description
Ft. Laramie	Everbearing	Very large, bright scarlet fruit, honey-sweet flavor, excellent fresh and for processing.
Ozark Beauty	Everbearing	Large scarlet-red fruit, very heavy producer and cold hardy
Shuksan	Spring	Early-ripening, medium-to-large fruit with excellent external and internal color.

### RASPBERRIES

Cultivar	Season	Description
Caroline	Everbearing	Large, firm, juicy, red berries, one crop in early Summer and one crop in the Fall.
Heritage	Everbearing	Large, sweet, dark red berries with a mild flavor.
Fall Gold	Everbearing	Large, conical, non-crumbling, very sweet, somewhat soft, golden berries.
Thornless Canby	Spring	Large, good flavored, bright red berry with a good shelf life

### BLACKBERRIES, PURPLE & BLACK RASPBERRIES

Cultivar	Description
Black Raspberry 'Munger'	Midseason bearer. Large, plump yet firm, shiny black berries.
Black Berry 'Chester'	Thornless, large, sweet, high quality berries with good flavor.
Marionberry	Berries are large, bright black with excellent flavor. All purpose, has very small seeds.
Thornless Loganberry	Cross of raspberry and blackberry, long, tasty, dark-red berries

### CURRENTS AND GOOSEBERRIES

Cultivar	Description
Cherry Red Currant	Large fruit with acid flavor. Mildew resistant.
Consort Black Currant	Medium clusters of somewhat soft black fruit. Very prominent, unique flavor.
Black Velvet Gooseberry	Deep purple fruit with excellent flavor. Excellent disease resistance.
Captivator Gooseberry	Deep red berries with excellent disease resistance and cold hardiness.

### HORSERADISH

Large, coarse leaved plant grown for its large white roots, which are peeled, grated, and pureed with vinegar or cream to make a condiment. The taste is similar to wasabi or Chinese hot mustard. Harvest sections of roots from the outside of the root clump through fall, winter, and spring, as you need them to ensure a fresh tangy taste.

## ELDERBERRIES

Cultivar	Description
Nova	Large, sweet, blue fruit. Ripens evenly and a bit earlier than 'York'. Easy care, large shrub. Pollinate with 'York'.
York	Juicy, sweet, purplish-black berries. Large creamy white flowers in spring. Pollinate with Nova. Easy care, large shrub.

## RHUBARB

Cultivar	Description
Crimson Cherry	Vigorous, long, thick, tender, sweet, rich red stalks. Harvests well in fall and seldom goes to seed. Long-lived.
Victoria	Color variation between green and red. Red appears first, then turns green with sunshine. Tends to grow seed stalks on an annual basis.

## ASPARAGUS

Cultivar	Description
Jersey Knight	A prodigious producer, this hardy variety offers up a bounty of large, tender, especially delicious spears. It is remarkably disease-resistant and thrives in pretty much any soil type.
Mary Washington	The standard commercial strain and the most popular US variety is resistant to some rust and blight, has a 6 week cutting season. Produces long straight spears with tight tips. Crowns are long lived and well adapted to the northwest. It is the hardiest asparagus strain we have test gardened. Prefers sweet soil with a pH of 6.8 to 7.2.
Sweet Purple	This new type of asparagus has many similar characteristics to green asparagus but offers something new for the asparagus connoisseur. The spears produced have several qualities which make it quite different from the common green varieties: deep-burgundy coloration is a striking difference, this type has 20% more sugar which allows it to commonly be eaten raw, and the spears are generally larger and more tender than that of its green counterpart which allows the cook to use the entire spear with little waste.

## BLUEBERRIES

Cultivar	Description
Jersey	Produces plentiful crops of light-blue berries. Resists cracking. Ripens in August.
Legacy	Enjoy long, abundant harvests of medium-sized, firm, sweet berries. Good disease resistance. Berries ripen on a beautiful plant that can grow up to 4-6 feet tall and produces beautiful foliage.
Patriot	Early, large fruit, heavy producer, cluster like grapes. Delicately sweet flavor.
Spartan	Early, large-best flavored berry, 5-6 ft. tall. Robust, fruity flavor.
Sweetheart	This self-pollinating variety is a favorite! Produces sweet, juicy berries that ripen in late-May/June. Second crop ripens in August.
