

BODACIOUS

Sweet Corn

Sweet, flavorful and exceptionally tender! Fine for canning and freezing. As dependable as it is delicious. Excellent disease resistance. With better after-harvest staying power than most corn, Bodacious offers huge yields that you needn't rush to eat all at once! Strong stalks. This delicious variety retains its sweetness for up to 10 days after harvest.

NOTES

VARIETY INFO

Botanical Name: *Zea mays* "Bodacious"

Plant Dimensions: 7 ft tall

Days to Maturity: 75

Zone: 3 - 10

SOWING & GROWING

Sow Outside: Sow the Bodacious corn seeds after the last frost, when the soil temperature has reached a minimum of 60 degrees Fahrenheit. Corn is a warm weather crop and the seeds will be slow in germinating in colder soil temperatures. Plant the seeds a half-inch deep in cooler soil, 1 1/2 inches deep for warmer soil.

Start Inside: Not recommended.

Days to Emerge: 5–10 days

Seed Depth: 1"

Seed Spacing: 6" - 8"

Row Spacing: 36"

Thinning: Not required.

HARVESTING INFO

Harvest: Bred to be sugar enhanced with tender kernels, Bodacious will retain that sweetness for up to 10 days after you pick it. With a relatively short growing period, you can start picking this sweet corn 72 to 75 days after planting.

Fruit: Packed with large, juicy, golden kernels-18 full rows on every 8-in. ear. Sweet, flavorful and exceptionally tender!
