

EARLY JERSEY WAKEFIELD

Cabbage

This early-maturing variety is delicious eaten fresh. The conical, solid, tightly held heads grow up to 15" long by 7" wide and weigh 3-4 pounds each. An historic variety, this cabbage was first grown in the United States by Francis Brill of Jersey City, New Jersey, in 1840. 60-75 days from transplant.

NOTES

VARIETY INFO

Botanical Name: *Brassica oleracea*

Plant Dimensions: 9" – 15"

Days to Maturity: 90 – 100

Zone: 3 – 9

SOWING INFO

Sow Outside: Not recommended.

Start Inside: Sow seed indoors ¼" deep about 8 weeks prior to transplanting. Take care not to disrupt the shallow root system while transplanting and weeding.

Make sure cabbage has a regular supply of water.

Days to Emerge: 7 – 12

Seed Depth: 1/4"

Seed Spacing: 12" – 18"

Row Spacing: 24" – 36"

Thinning: Not required.

GROWING INFO

Harvesting: Early Jersey Wakefield cabbage is ready for harvesting about two months after transplanting.

They will hold in the garden for two or three weeks after they mature, but if left standing in the garden too long the heads will begin to split.

Fruit: 5" long by 7" wide and weigh 3-4 pounds
