

# EARLY WONDER

## Beet

Early Wonder is customer favorite and one of our best sellers! The best variety of beet for greens. Super fast-growing, flavorful, and sweet! Special Instructions: Soak seeds overnight in a damp towel before planting for better germination. Keep soil consistently and evenly moist to prevent beets from becoming woody. Succession plants every 2-3 weeks for longer harvest.

## NOTES

### VARIETY INFO

**Botanical Name:** *Beta Vulgaris* 'Early Wonder'

**Plant Dimensions:** 10" - 12"

**Days to Maturity:** 55 - 60

**Zone:** 3 - 9

### SOWING INFO

**Sow Outside:** RECOMMENDED. 2 to 4 weeks before your average last frost date, when soil temperature is at least 45°F, ideally 60°-85°F, for early summer crop. 6 to 8 weeks before your average first fall frost date for late summer/fall crop. Mild Climates: Sow fall through winter.

**Start Inside:** Not recommended.

**Days to Emerge:** 14 - 21 days

**Seed Depth:** 1/2"

**Seed Spacing:** 2" -4"

**Row Spacing:** 24"

**Thinning:** Not required.

### GROWING INFO

**Harvesting:** For early spring sowings, harvest beets before summer heat. For late summer sowings, harvest before first heavy freeze. For winter sowings in mild climates, harvest in early spring. Harvest when roots are anywhere from 1"-3" in diameter.

**Fruit:** 3-4" deep red globes that are sweet and tender.
