

# INDIAN CORN

## Corn

Indian Corn is one of the oldest varieties of corn. It is widely known as a symbol of Fall and the American harvest season. Its kernels come in a wide range of colors including white, red, yellow, brown and blue.

## NOTES

### VARIETY INFO

**Botanical Name:** *Zea mays var 'Indian Corn'*

**Plant Dimensions:** 8-10"

**Days to Maturity:** 105 -115

**Zone:** 3-9

### SOWING INFO

**Sow Outside:** Ornamental corn seeds should be planted after soil temps have reached 55-60 F. Sow seeds to a depth of 1-2 inches deep and 8-10 inches apart for small eared varieties and 10-12 inches apart for large eared

**Start Inside:** Not Recommended.

**Days to Emerge:** 5 - 10 days

**Seed Depth:** 1-2"

**Seed Spacing:** 10-12"

**Row Spacing:** 30-42"

**Thinning:** Plant in rows 2 1/2 to 3 feet apart. Drop seed every 5 to 6 inches and cover with 1 inch of soil. Plants should be thinned, leaving one stalk every 12 inches.

### GROWING INFO

**Harvesting:** Ornamental corn is harvested by hand after the husk has dried and when the ears are no longer green but dried slightly and fully mature. To harvest, break the ears off with a quick downward tug leaving the husk on to finish drying over the course of a week

**Fruit:** 9" ears.
