

MARGLOBE

Tomato

The Marglobe Tomato is one of the old time favorite of the home gardener and one of the best heirloom tomatoes on the market as it is humidity, disease, and crack resistant. The plant yields high volume of medium sized globe-shaped tomatoes, versatile enough to fit just about any dish - salad, sandwich, or canned.

NOTES

VARIETY INFO

Botanical Name: *Lycopersicon esculentum* "Marglobe"

Plant Dimensions: 80

Days to Maturity: 3-10

Zone: 3-9

SOWING INFO

Sow Outside: Not recommended.

Start Inside: Planting in a growing tray for indoor start: Fill each spot with soil leaving a quarter inch at the top. Put 2-3 seeds per container then sprinkle soil on top. Keep soil moist but not soaked. Once plants start forming, more water can be applied. Keep in area that allows for plenty of sunlight and rotate regularly. Directly planting in garden: Plant in rows with 2-3 seeds per section with about 2' separation from next section. Add stakes as needed to keep plants upright"

Days to Emerge: 5–10 days

Seed Depth: 1/4"

Seed Spacing: 18-36"

Row Spacing: 36"

Thinning: Not necessary

GROWING INFO

Harvesting: When the tomato is 1/2 green and 1/2 pink is when you can start harvesting your tomato. It will continue to ripen once picked. Keep in cool place to allow it to ripen without damaging the fruit or losing flavor or nutrients.

Fruit: 1/2 green and 1/2 pink
