

# PRIZEHEAD

## Lettuce

The Prizehead Lettuce produces luscious slow bolting heads of loose, large green leaves with curled maroon tips. This variety is a popular lettuce for both home gardens and markets. Prizehead is truly a prize for its flavor being great in salads and sandwiches.

## NOTES

### VARIETY INFO

**Botanical Name:** *Lactuca sativa*

**Plant Dimensions:** 10 to 12 inches wide

**Days to Maturity:** 45

**Zone:** 3-12

### SOWING INFO

**Sow Outside:** For direct seeding, seeds germinate at low soil temperatures (40°F), but poorly above 75°F. Sow seeds 2-3" apart, rows 12–18" apart. Cover seed lightly, about 1/8", and firm soil gently.

**Start Inside:** For transplanting, sow 2-3 seeds per cell, 1/4" deep, 3-4 weeks before transplanting outdoors. Do not let soil above 70F while germinating so keep out of sun and a cool, dark location. Harden seedlings by reducing water and temperature for 2–3 days before planting outdoors.

**Days to Emerge:** 7 - 14 days

**Seed Depth:** 1/2"

**Seed Spacing:** 1 – 2"

**Row Spacing:** 18"

**Thinning:** Not necessary.

### GROWING INFO

**Harvesting:** Prizehead Lettuce can be harvested within 50 to 55 days, when the heads are roughly 8 to 10 inches in size, and are green to red. Rinse and enjoy, or store in the fridge for later use.
