

TRINITY

Sweet Corn

With the ears sitting on 5- and 1/2-foot stocks, this delicious bi-color sweet corn arrives in a protective husk and produces ears that average about 8" long with solid tip fill. 68 days to maturity.

NOTES

VARIETY INFO

Botanical Name: *Zea mays* "Trinity"

Plant Dimensions: 6 and 8 feet tall

Days to Maturity: 65 - 90

Zone: 4-8

SOWING INFO

Sow Outside: Plant 'Ambrosia' sweet corn seeds about two weeks after the last spring frost date when the soil has warmed to at least 50 degrees Fahrenheit. Sweet corn planting depth is about 1 1/2 to 2 inches deep into moist, heavy soils. In dry, sandy soils, sow seeds 2 to 2-1/2 inches deep.

Start Inside: Not Recommended.

Days to Emerge: 7-10 days.

Seed Depth: 1-2"

Seed Spacing: 8-10"

Row Spacing:

Thinning: Not required.

GROWING INFO

Harvesting: Harvest when tassels begin to turn brown and cobs start to swell. Kernels should be full and milky. Pull ears downward and twist to take off stalk. Sugary (su) varieties begin to lose their sweetness soon after harvesting, so use them as soon as possible.

Fruit: 8" ear that has 14-16 rows of fine-grained, tender-crisp, very sweet kernels.
