

YELLOW SWEET SPANISH UTAH

Onions

A large, sweet yellow onion. Loved for its mild, sweet flavor. Excellent raw. It does well in Western states and similar climates. It has fair storage characteristics. Intermediate day.

NOTES

VARIETY INFO

Botanical Name: *Allium cepa*

Plant Dimensions: 6"

Days to Maturity: 110–130

Zone: 4-10

SOWING INFO

Sow Outside: 4 to 6 weeks before your average last frost date, or as soon as soil can be worked; when soil temperature is at least 45°F.

Start Inside: RECOMMENDED. 10 to 12 weeks before your average last frost date. Transplant outdoors 4 to 6 weeks before your average last frost date. The earlier the start, the bigger the bulb. Ideal soil temperature is 60°–85°F.

Days to Emerge: 7–15 days

Seed Depth: 1/4"

Seed Spacing: 6"–8"

Row Spacing: 12"–16"

Thinning: When 2" tall, thin to 1 every 6"–8"

GROWING INFO

Harvesting: When onion tops have fallen over and turned yellow or brown. Harvest in the morning, lifting onions with a garden fork. Dry them in the sun for 2 to 3 days, lightly covering the bulbs with straw, or the tops of other onions to prevent sunscald. Cure onions for 3 to 7 days in a dry area with good air circulation. Once dry, cut the roots to 1/4", and the greens to 1" to create a seal, preventing decay.

Fruit: 3"–6" globe-shaped bulbs with amazingly mild, sweet flavor.
